DETAILED ACTION
Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-13, drawn to a dry powdered diet, which when mixed with water forms a gel.

Group 2, claim(s) 14, drawn to a method of forming a cold setting gel feed comprising a dry powdered diet, which when mixed with water forms a gel.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The corresponding technical feature linking Groups I and II is a dry powdered diet, which when mixed with water forms a gel. Kurzinger (US 2002/0086089) teaches of a dry powdered diet, which when mixed with water forms a gel (abstract and paragraphs 0007 and 0009), thus the technical feature linking the groups does not provide a single general inventive concept and is not a special technical corresponding feature. Group I and Group II are not linked by a special technical feature.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
